

Workforce of the Future Conference 2016

Care Coordination & Transition Management (CCTM)

In Partnership with NWFPD, BHMT, National Patient Care Services, HealthStream & the Education Fund

The Care Coordination and Transition Management (CCTM) online course and text define the integral role of the RN in the interprofessional team and applies to nurses in all setting from ambulatory care to hospitals.

The content was originally developed by the American Academy of Ambulatory Care Nursing (AAACN) and redesign in partnership with National Workforce Planning and Development, Ben Hudnall Memorial Trust, National Patient Care Services, and HealthStream.

The price for all 13 modules is \$30 and is only available for KP employees. Our collaboration has resulted in a format and price that promotes accessibility to our Kaiser Permanente nursing community.

These resources are a “must have” for any registered nurse who is responsible for coordinating care and managing transitions. They are designed to improve patient outcomes, decrease health care costs, and promote sustainable system change.

The CCTM online course and core test will help nurses solve the puzzle of fragmented patient care. It is an evidence-based, patient-care program designed to:

- Improve patient outcomes
- Enhance access to quality care
- Decrease hospital readmissions
- Decrease health care costs
- Help patients navigate the health care system
- Ensure continuity and seamless transitions among levels and settings of care
